# DUBROVNIK

## *Walk through centuries*

*An independent, merchant republic for 700 years (abolished by Napoleon in 1806), it traded with Turkey and India in the East (with a consul in Goa, India) and had trade representatives in Africa, in the Cape Verde Islands. It even had diplomatic relations with the English court in the Middle Ages. (There is a letter from Elizabeth I on display in the City Museum in Dubrovnik). Its status was such that powerful and rich Venice was envious of this Croatian-Slav city.*

## CROATIA: RICH CULTURAL, HISTORICAL & CERAMICS SCIENCE HERITAGE

**Organizers:** CROCERS – members with broad experience in Materials R&D, Applied materials science, advanced characterisation tools

**Support by:** University of Zagreb, Faculty of Chemical Engineering and Technology, Centre for Advanced Academic Studies Dubrovnik

100 attendees

**Dubrovnik heritage:** RESTAURATION, local ROOFTILES manufacture

**Agency:** DUBROVNIK SUN d.o.o. – 500+ conferences; 150 000 participants

A long-exposure photograph of Dubrovnik, Croatia, at night. The image shows the historic stone walls of the Old Town, illuminated by warm lights. Several boats are docked in the harbor, their lights reflecting on the water. The sky is a deep blue, and the overall scene is serene and picturesque.

## INTERESTING THINGS ABOUT DUBROVNIK

# THE BEGINNING OF THE QUARANTINE REGULATION IN EUROPE

Since ancient times, societies have attempted to separate people with disease from those who remained unaffected, with references to self-isolation dating back to the Old Testament. As Covid-19 sweeps across the globe, we are advised to "self-quarantine" if we have recently returned from a part of the world where the virus is rapidly spreading, or if we have knowingly come into contact with an infected person. To understand the importance of self-quarantining during this modern-day pandemic, it's helpful to look back to the history of the word "quarantine" itself, which traces its origins to medieval Europe.

The word "quarantine" has Italian roots: in an effort to protect coastal cities from the Black Death ravaging 14th-Century Europe, ships arriving in Venice from infected ports were required to sit at anchor for 40 days (*quaranta giorni*) before landing, a practice that eventually became known as quarantine – derived from 'quarantino', the Italian word for a 40-day period.

Venice that stated all ships and passengers had to be stationed on the nearby island of San Lazzaro until the special health council gave them permission to enter the city." This led to the discrimination of ships and travellers from certain countries as well as other wrongdoing that was occurring in Venice regularly," writes co-author Ante Milošević, PhD, in *Lazaretto in Dubrovnik: The Beginning of the Quarantine Regulation in Europe*. Co-author Ana Bakija-Konsuo, MD-PhD, added that Dubrovnik was the first Mediterranean port to sequester people, animals and merchandise coming from infected areas by sea or land, keeping them separate from the healthy population, while Venice stopped all ships and trade, halting life in the city.
