

The International SERP-Chem Master is a two-year programme in **Surface, Electro, Radiation and Photo-Chemistry** with elements of management, business, innovation, communication and patent law.

The SERP-Chem Master aims at training students in the most performing experimental and theoretical tools and concepts used in areas of great relevance such as:

Green chemistry

Nanomedicine

Industrial and medical use of radiations

Catalysis and industrial processes

A summer school aiming at developing the students **entrepreneurial skills** is part of the Master.

Students will attend lectures in at least **two different countries** among France, Italy, Portugal and Poland.

All the lectures are in **English** and language courses will also be given.

With best regards,

Sandrine LACOMBE, PhD

Director of SERP-Chem Master.

Head of the biophysics and biophotonic group.

ISMO, Univ. Paris Sud

F-91405 Orsay cedex

SERP-Chem Master

**Four top
European universities**

France – Italy – Portugal - Poland

How to apply ?

- ✓ Students in the last year of Bachelor studies (Chemistry or Physics) with English skills can apply
- ✓ General deadline : June 15th 2014
- ✓ Deadline for the Erasmus Mundus scholarship : January 13th 2014

Online submission:

<http://www.serp-chem.eu/>

**A limited number of Erasmus
Mundus scholarships are offered:**

- ✓ 500€/month for European students
- ✓ 1000€/month for non-European students + 4000€/year
