

No plans this summer? Spend it in France

The IPL Summer School is a dynamic **month-long English-taught program** for science students looking to expand their knowledge of hands-on industrial applications of polymer chemistry.

In a nutshell, the summer school involves us hosting a group of international students in Lyon for **science and engineering classes, French training, and a host of off-site activities**, both industrial and cultural.

For whom?

Students who have completed one or two years of undergraduate studies in the sciences

When?

From June 13, 2024
to July 11, 2024

How much?

€2,150

What is included?

French classes

Three groups: beginner, intermediate, or advanced levels

Housing for the whole program is included. Local transportation and to all excursions is also included.

Housing and transportation

Cultural and industrial activities

Visits will include the CERN in Geneva, a winery and a chocolate factory at Tain l'Hermitage and visits in Lyon...

As well as a behind the scenes visit at a company, a cooking class for French desserts, not to mention whatever self-organized weekend trips you may choose to take!

Scientific courses

At ITECH, students learn about **polymer chemistry** and its applications in various materials (textiles, leather, plastic, paint, cosmetics, adhesives), as well as analytical lab skills and colorimetry which are applied to all the other specialties.
